

Seminars

Introductory Seminar

How to benefit from cultural diversity.

Financial Modelling with Excel

Modelling in MS Excel: accessing mathematical, statistical, lookup and other functions. Building user-defined functions, process automation and best practices for applications to financial modelling.

SAP

The course aims to prepare participants to navigate SAP Enterprise Resource Planning software and, with a view to a profound study of SAP software products, it will provide them broad-based knowledge of SAP resources and basic concepts.

Ethics & corporate governance

Professional principles and values in the finance industry; purpose and relevance of ethical standards for finance professionals.
